Carte Blanche to Milène Guermont

The Grand Palais Immersif offers Milène Guermont a carte blanche that highlights twenty years of artistic research at the crossroads of art and engineering.

January 22, 2026

The Grand Palais Immersif offers an immersion into the world of Milène Guermont, through iconic installations, more than 500 illustrations, including exclusive photographs, as well as a set of films from a series of experimental videos; all this in the idea of celebrating twenty years of artistic research, in Paris or in the bay of Mont-Saint-Michel. To accompany this retrospective, a documentary by ARTE is also broadcast, precisely in the idea of prolonging this journey within a poetically sensitive artistic universe.
